PCF PF ( )

PCF

- :
- decreasing water consumption
  - decreasing electric power
  - equal cleaning over the total press felt width
  - increasing lifetime of the press felt
  - 100% mist free operation during production
  - decreasing of chemical consumption
  - nozzle check or exchanging during production
  - strip edge cleaning
  - safety moisture and permeability measuring
  - no need for manual measurement by scanpro
  - easy moisture and permeability measuring from operation room
  - direct cleaning action possibility if a stroke of the press felt is dirty

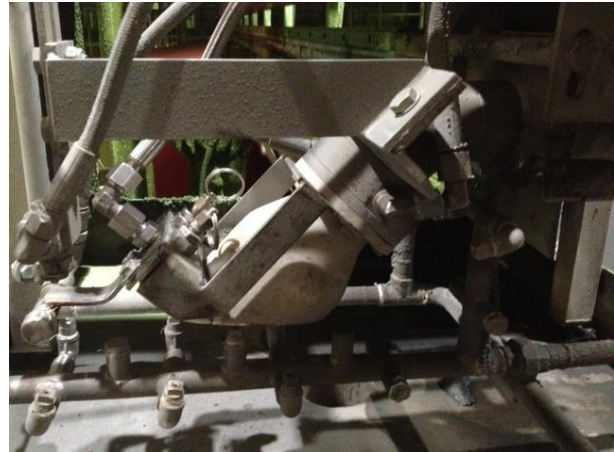

**PCF**  
**MAINTENANCE B.V.**

### **PCF DF Cleaner (Dryer Fabric Cleaner)**

Continuous and discontinuous dryer fabric cleaning equipment over the full dryer fabric width by HP water and compressed air.

Teflon cleaning head for Dryer Fabric cleaning with HP water

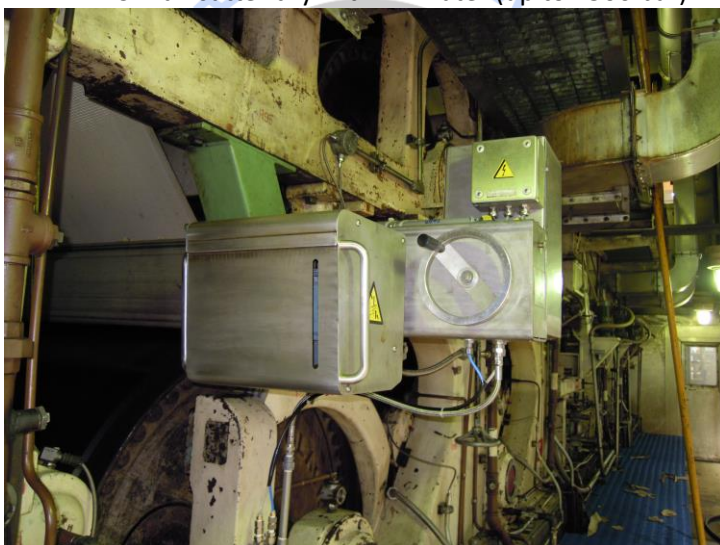

Teflon cleaning head for Dryer Fabric cleaning with HP water and passivation fluid

### **Advantages:**

- increasing CFM Value
- less breaks because of clean dryer fabric
- increasing paper quality
- less contamination rolls
- decreasing cleaning shut downs and cleaning time
- increasing production efficiency
- increasing life time of the dryer fabric
- delivery of spare parts at short notice

### **Cutting equipment**

- PCF Tail cutter wet section
- PCF Tail and deckle cutter wet section
- PCF Tail cutter dry with fixed knife
- PCF Tail cutter dry with rotating knife
- PCF Tail cutter dry with HP water (up to 2500 bar)

PCF Tail cutter dry with rotating knife

### Silpas Superb Passivation System

- Online surface treatment by chemical apply
- The treatment reduces surface contamination of stickies and fiber picking / built up
- Accumulation will hereby be prevented

#### Application of this system:

- On Dryer Fabrics
- On Dryer Cilinders
- On Calander rolls (by recycled paper)

### Advantages:

- Considerable reduction of surface contamination within the dryer section on:
  - Dryer fabrics
  - Dryer cilinders
  - Guide rolls
- Increasing paper production
- Improving sheet quality
- Lubrication for doctor blades, increasing blade life
- Increasing safety through reduced use of solvents
- Reduce sheet breaks
- Reducing cleaning works.

All equipment have been well exported to India, China, Thailand, South Africa, South America, Middle East, Indonesia, Australia and Europe.

Our philosophy is based on long term relationships with our clients, built on mutual trust and confidence. With over 25 years of professional experience we intend to maintain delivery of quality service built upon following concepts:

- Competitive prices
- Superior customer service
- Timely and efficient delivery

For more information or return of investment see our website [www.pcfmaintenance.nl](http://www.pcfmaintenance.nl)

If you have any questions, please feel free to contact us, we will do our utmost to meet your demands. We sincerely hope that we will have a chance to cooperate and built up a long business relationship.

Looking forward to hear from you.

Best regards,  
PCF Maintenance bv / PCF Asia bv
